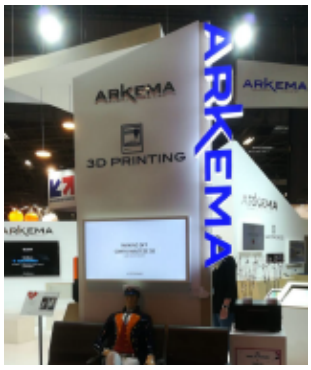
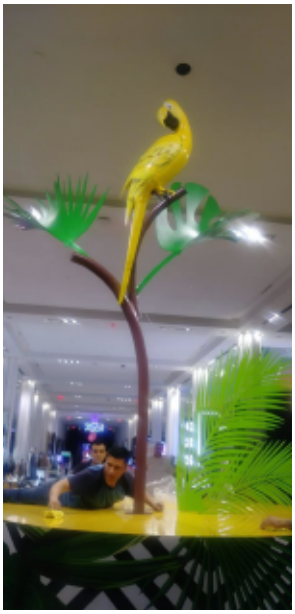
3D PRINTING





WHY 3D PRINTING?

Engage your audience with untraditional, unique advertising! 3D printing gives you unlimited options to create a one of a kind piece that is unique to your company. Combining 2D printing with 3D elements will make everyone stop and take notice of your company.

Think 3D printing takes forever? Think again! Pieces are built as hollow structures, reducing print time, and making them light-weight and easier to maneuver. This process also allows you to light your piece from within.

There is no limit when it comes to the shapes you can make; twists, curves, and bevels are handled with ease. Post finishing offers a lot of ways to make your piece truly unique. It can be left as-is, painted, or wrapped in custom printed vinyl to make it the perfect statement piece for your brand.
