

# WIND A-FRAMES

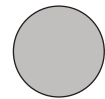

## PRODUCT DESCRIPTION

Wind A-Frames are perfect for outdoor advertising because it is built to resist head-on winds. You can choose between the standard face design, or opt for the Quick-Change™ feature to easily swap out signs.

These frames are built with a new, wider base that contains coil springs. These springs allow the sign to sway in the wind, bringing it back to an upright position. The base will need to be filled with sand to increase stability.

## COLORS

gray

black
